Memorandum of Understanding: HIW and the Agency

Revision history and approval

Version	1.1	
Date created	November 2017	
Date of last review	Dec 2019	
Authors	HIW: Joseph Wilton	
	The Agency: Victoria Crawford	
Date agreed	06 February 2020	
Formally agreed by	HIW: Kate Chamberlain	
	The Agency: Dr June Raine, Interim Chief Executive	
Review date	April 2020	

Introduction

- 1. The purpose of this Memorandum of Understanding (MoU) is to set out a framework to support the working relationship between Healthcare Inspectorate Wales (HIW) and the Medicines and Healthcare products Regulatory Agency ('the Agency').
- 2. This working relationship is part of the maintenance of an effective regulatory system for health and adult social care in England and Wales which promotes patient safety and high quality care.
- 3. This MoU relates only to the regulation of healthcare in Wales. It does not override the statutory responsibilities and functions of HIW and the Agency and does not create legally binding rights or obligations; its purpose is to define the joint agreement between the two organisations and to indicate a common line of action.
- 4. As part of the activities undertaken as part of this MoU, other agreements (for example, information sharing agreements, or joint working protocols) may be established. Such agreements will exist separately to this MoU.

Roles and responsibilities

Healthcare Inspectorate Wales

- 5. HIW is the independent inspectorate and regulator of healthcare in Wales. HIW carries out its functions on behalf of Welsh Ministers and, although part of the Welsh Government, protocols have been established to safeguard its operational autonomy. HIW's main functions and responsibilities are drawn from the following legislation:
 - Health and Social Care (Community Health and Standards) Act 2003;
 - Care Standards Act 20 (and associated regulations);
 - Mental Health Act 1983 and 2007, Mental Health (Wales) Measure 2010;
 - Independent Health Care (Wales) Regulations 2011;
 - Controlled Drugs (Supervision of Management and Use) (Wales)
 Regulations 2008; and
 - Ionising Radiation (Medical Exposure) Regulations 2017 and Amendment Regulations 2018.
- 6. HIW's priorities are to:
 - To maximise the impact of our work to support improvement in healthcare;
 - To take action when standards are not met;

- To be more visible; and
- To develop our people and our organisation to do the best job possible.
- 7. HIW's core role is to review and inspect NHS and independent healthcare organisations in Wales to provide independent assurance for patients, the public, and others that services are safe and of good quality. Health services are reviewed against a range of published standards, policies, guidance and regulations. As part of this work HIW will seek to identify and support improvements in services and the actions required to achieve this. If necessary, HIW will undertake special reviews and investigations where there appears to be systematic failures in delivering healthcare services to ensure that rapid improvement and learning takes place.
- 8. HIW is also responsible for the registration and regulation of independent healthcare providers under the Care Standards Act 2000 and HIW looks at how they meet the National Minimum Standards for Independent Health Care Services in Wales. The regulation of such establishments is governed by the Independent Health Care (Wales) Regulations 2011.

The Medicines and Healthcare products Regulatory Agency

- 9. The Agency is an Executive Agency of the Department of Health and was established on 1 April 2003. The Agency has three centres:
 - The Clinical Practice Research Datalink (CPRD) a data research service that aims to improve public health by using anonymised NHS clinical data;
 - The National Institute for Biological Standards and Control (NIBSC) a global leader in the standardisation and control of biological medicines; and
 - The Medicines and Healthcare products Regulatory Agency (MHRA)
 regulatory centre the UK's regulator of medicines, medical devices and
 blood components for transfusion. The regulatory centre is responsible for:
 ensuring their safety, quality and efficacy/performance; supporting
 innovation and new products being developed safely for the benefit of
 public health; monitoring the safety of medicines devices and blood; and,
 ensuring secure supply in globalised industries.
- 10. The Agency is the UK Competent Authority under relevant EU Directives for medicinal products, medical devices and for blood and blood components. The Agency's objectives are to:
 - Safeguard public health through our primary role in ensuring that the products we regulate meet required standards of safety, quality and efficacy;
 - Carry out our communication role through the provision of accurate, timely and authoritative information to healthcare professionals, patients and the public;

- Support research, ensuring through the application of better regulation principles that regulation does not stifle innovation;
- Influence the shape of the future regulatory framework through use of our effective European and international relationships; and
- Run an organisation with a skilled and equipped workforce that is fit for the future.
- 11. The Agency's objectives are achieved through:
 - Authorising medicines before they can be marketed, taking both their safety and efficacy into account;
 - Ensuring clinical trials meet robust standards and safeguard the interests of patients;
 - Inspecting the quality of medicines as manufactured and distributed;
 - Overseeing UK Notified Bodies that audit medical device manufacturers;
 - Encouraging the reporting of suspected problems with both medicines and devices and investigating reports, including taking action where necessary; and
 - Investigating and prosecuting where necessary, cases of non-compliance.

Principles of co-operation

- 12. HIW and the Agency acknowledge their respective statutory and non-statutory responsibilities and functions, and will take account of these when working together.
- 13. In implementing this agreement, HIW and the Agency intend that their working relationship will be characterised by the following principles:
 - the need to make decisions that promote high quality healthcare and which protect and promote patient health, safety and welfare;
 - full openness and transparency between the two organisations as to when cooperation is, and is not, considered necessary or appropriate;
 - respect of each other's independent status;
 - the need to use resources and intelligence effectively and efficiently through appropriate coordination and information sharing;
 - the need to maintain public confidence in the two organisations; and
 - a commitment to address any identified overlaps or gaps in the regulatory framework and responsibilities.
- 14. HIW and the Agency are also committed to transparent, accountable, proportionate, consistent, and targeted regulation (the principles of better regulation).

Joint Priorities and Areas of Work

Exchange of Information

- 15. Co-operation between HIW and the Agency will often require the exchange of information. Exchange of information will be expected, but not limited, to cases where:
 - either HIW or the Agency identifies concerns about the health and wellbeing of the public, particularly in relation to the safety of health and care services, or activities relating to the use of medicines, devices or blood and those concerns are considered to be relevant to the other organisation's regulatory functions; and
 - a resolution to a concern would benefit from a coordinated multi-agency response.
- 16. In such cases, all exchanges of information will be lawful and proportionate and shared in confidence with the named contact in the other organisation at the earliest possible opportunity.
- 17. All arrangements for co-operation and exchange of information set out in this MoU and any joint working protocol that may be developed will take account of and comply with the General Data Protection Regulation, Data Protection Act 2018, Freedom of Information Act 2000, Health and Social Care (Community Health and Standards) Act 2003, section 76 of the Health and Social Care Act 2008, Care Standards Act 2000, the Clinical Trials Directive (Directive 2001/20/EC), and all relevant HIW and Agency legislation relating to these matters, and respective Codes of Practice, frameworks or other policies relating to confidential personal information and information issues.
- 18. Both HIW and the Agency are subject to the General Data Protection Regulation and Data Protection Act 2018. If one organisation receives a request for information that originated from the other the receiving organisation will discuss the request with the other before responding.

Communications

- 19. HIW and the Agency will seek to give each other adequate warning of, and sufficient information about, any planned announcements to the public on issues relevant to both organisations, including the sharing of draft proposals and publications.
- 20. HIW and the Agency commit to work together, where appropriate, to produce joint statements or communications highlighting collaboration or activities relevant to both organisations.
- 21. HIW and the Agency will explore opportunities for joint engagement activity with patients and patient groups as part of a wider ambition to increase their involvement in the regulatory decision-making process.
- 22. HIW and the Agency respect confidentiality of any documents shared in advance of publication and will not act in any way that would cause the content of those documents to be made public ahead of the planned publication date.

Governance

- 23. The effectiveness of the working relationship between HIW and the Agency will be supported by regular contact, either formally or informally.
- 24. At a minimum, there will be an annual meeting between Chief Executives to discuss strategic concerns relevant to both organisations. Meetings to discuss intelligence, policy and operational issues of interest to both organisations should take place between relevant colleagues at both organisations when appropriate, and at least twice a year. Contact details of relevant operational level contacts in each organisation are shown at Annex A.
- 25. Any disagreement between HIW and the Agency will normally be resolved at working level. If this is not possible, it must be brought to the attention of the MoU managers identified at Annex A, who may then escalate it as appropriate within the two organisations to reach a mutually satisfactory resolution. Both organisations should aim to resolve disagreements in a reasonable time.

Duration and review of this MoU

- 26. Both organisations have identified a person responsible for the management of this MoU in <u>Annex A</u>. They will liaise as required to ensure this MoU is kept up to date, identify any emerging issues and resolve any questions that arise in the working relationship between the two organisations.
- 27. This MoU is not time-limited and will continue to have effect unless the principles described need to be altered or cease to be relevant. This MoU will be reviewed annually by the MoU managers identified at <u>Annex A</u>, but may also be reviewed more urgently at any time at the request of either organisation.

Signed
